

## Readme

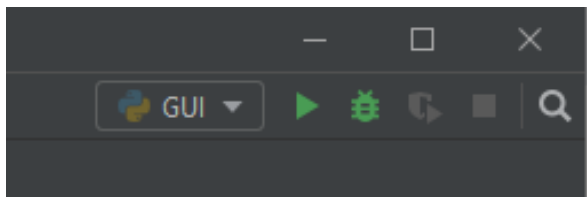

Instruction on how to run in PyCharm:

1. Download the python file.
2. Download the car\_rental.db
3. Open python file in PyCharm.
4. Add the car\_rental.db file in the same path as the python file.
5. Run the program.

In PyCharm both files need to be under same folder as shown below:

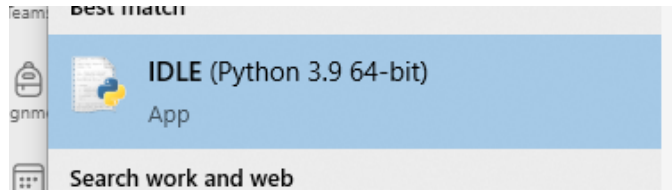

To run the program on PyCharm, click on the green play symbol which is located on the top right of the screen.

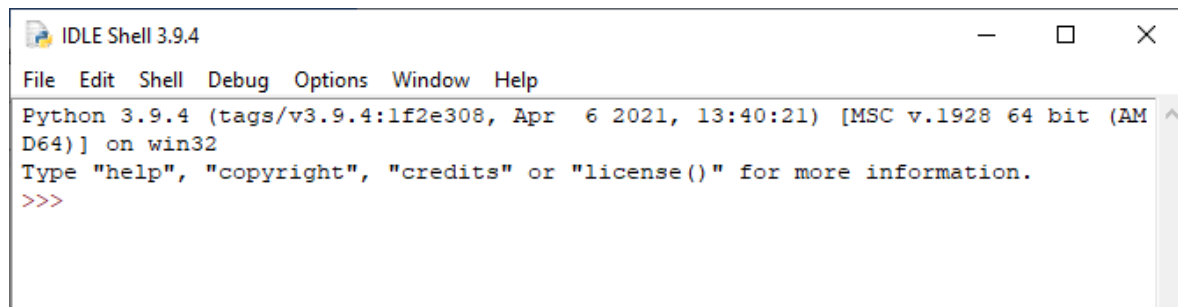

## Instructions on how to run in IDLE Python:

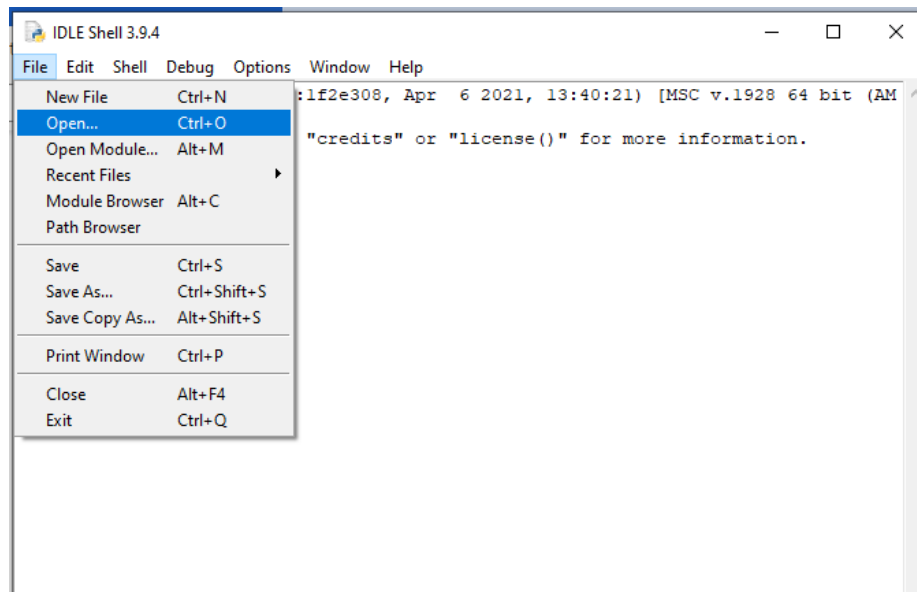

After installing, launch the app.

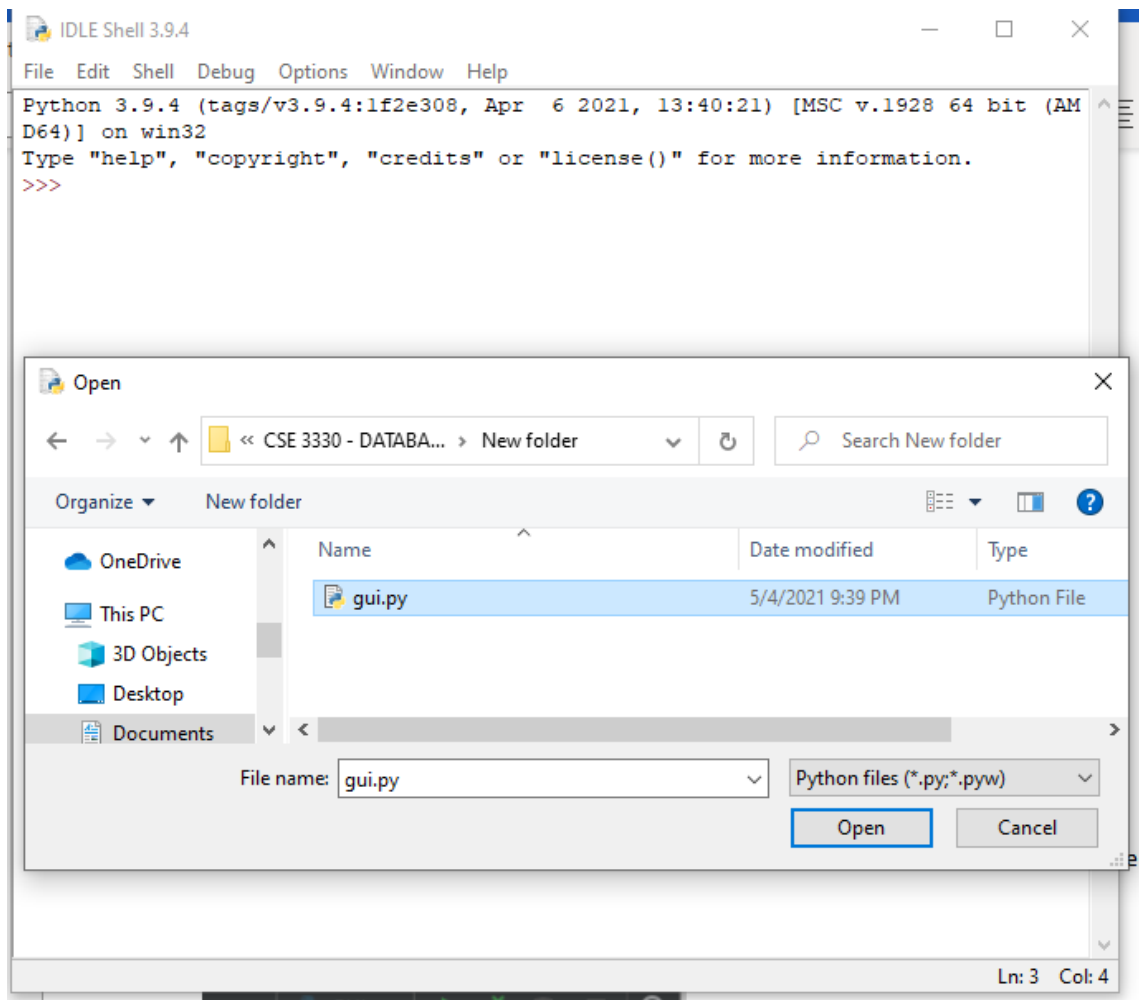

The main window will look like this:

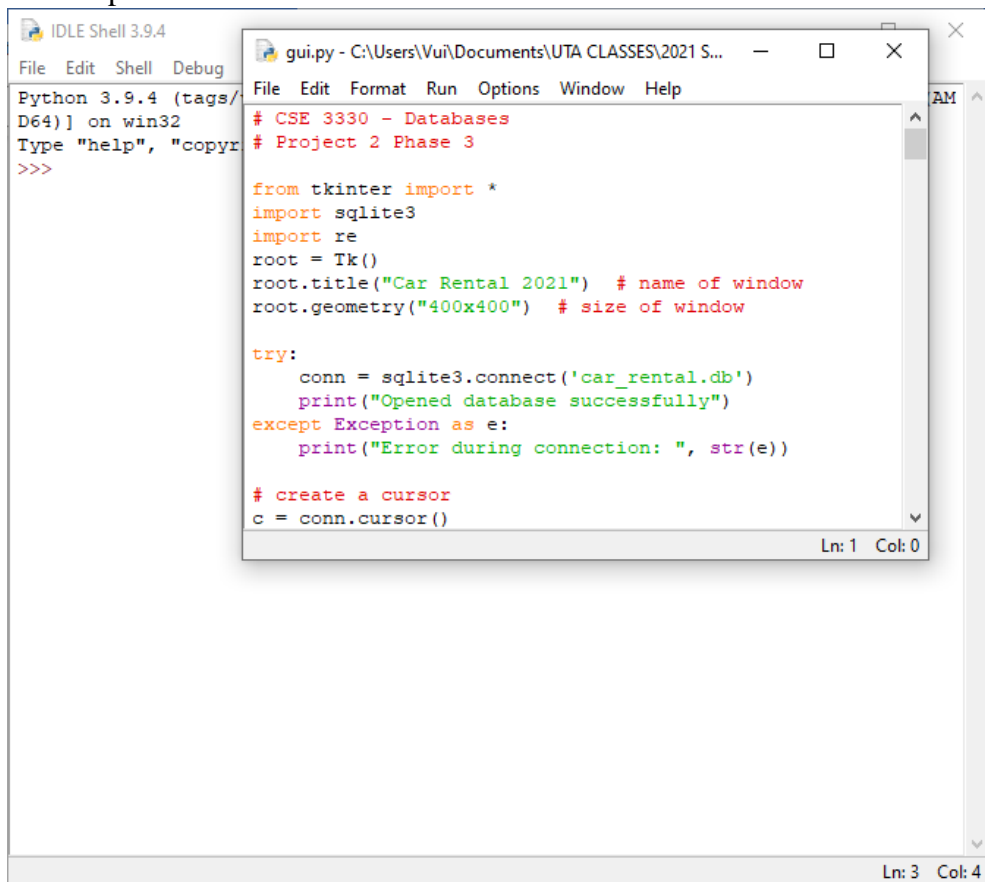

Select File → Open (Ctrl+O) to open the Python file.

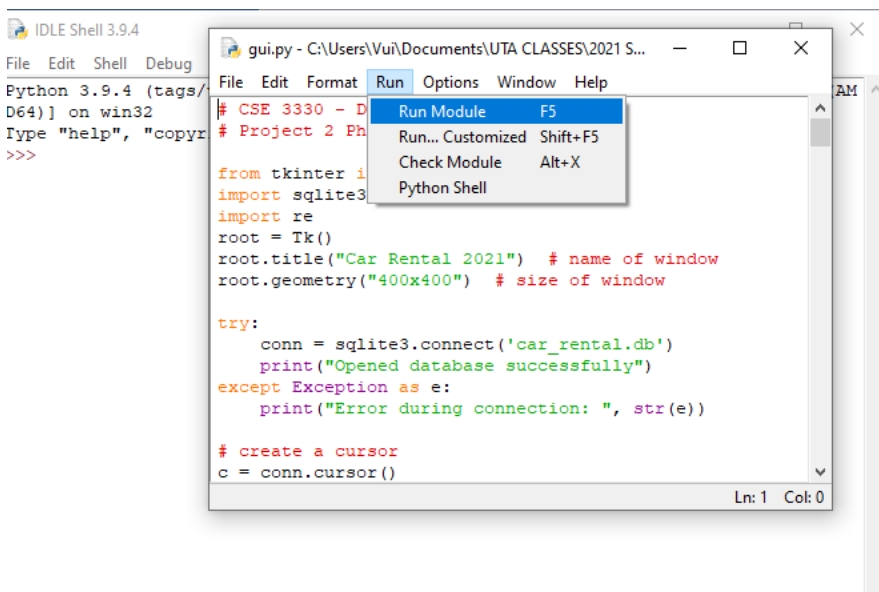

Browse and choose the python file. Click Open.

It will open a window where we can edit our code.

Select Run → Run Module (F5) to run the code.

The GUI Application will be available to use.
